FUTURE EVENTS

Rally for Concerned Photographers

Ken Duncan is organising a Sydney rally to raise awareness about the eroding rights of photographers in Australia.

...Australian photographers are losing their rights to freedom of expression. And it doesn't matter whether they are full-time professional, part-time or strictly amateur, as every person who has a camera can be threatened with unjust laws and regulations.

To this end, Arts Freedom Australia (AFA) will hold a rally near Campbells Cove on Sydney Harbour on Sunday August 29th between 10am and 12 noon to reinforce its message. “We need to make the Australian public aware of this threat to our freedoms” Mr. Duncan said. He went on to say “what we should have in this country are simple rules – like they have in America’s national parks – which allow photography to be carried out in all places where the public can go”.

Please find below the link regarding the protest re Photographers rights.
